About Mended Hearts

Mended Hearts is the nation’s oldest peer-to-peer cardiac support group and the largest cardiovascular patient organization. Our over 20,000 members, comprised of heart patients and caregivers, provide social, emotional, and practical support throughout the journey of recovery.

Mended Hearts has accredited visiting programs nationwide in 460 hospitals. Our visitors are trained men and women who have themselves been impacted by heart disease. These volunteers conduct over 225,000 in-person patient visits each year—not counting the large number of online visits.

For more than 60 years, Mended Hearts has been offering the gift of hope and encouragement to heart patients, families and caregivers... enabling them to live happier, fuller lives.

What is Heart Disease?

Heart disease is the number one killer of men and women in the U.S., claiming more lives each year than cancer, respiratory diseases, and accidents combined. Heart disease causes more than 600,000 deaths per year, which means one out of every four deaths is due to heart disease.
