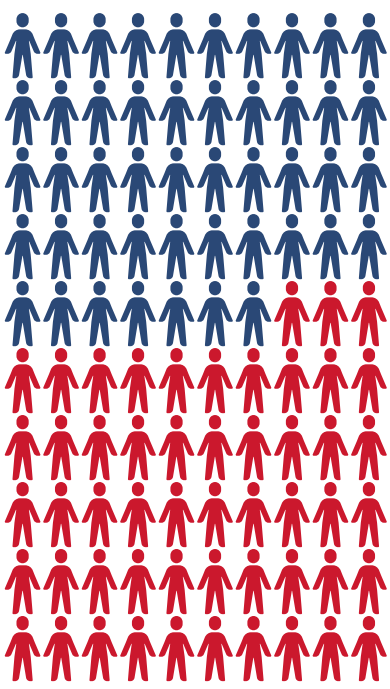
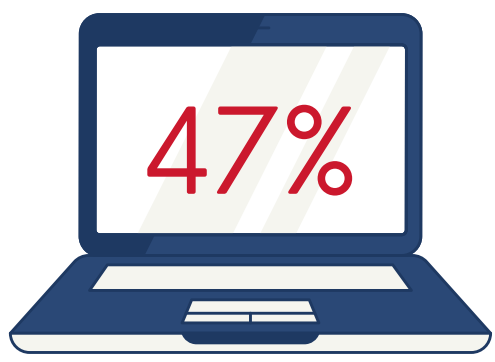
Advancing Innovation Through Clinical Trial Education

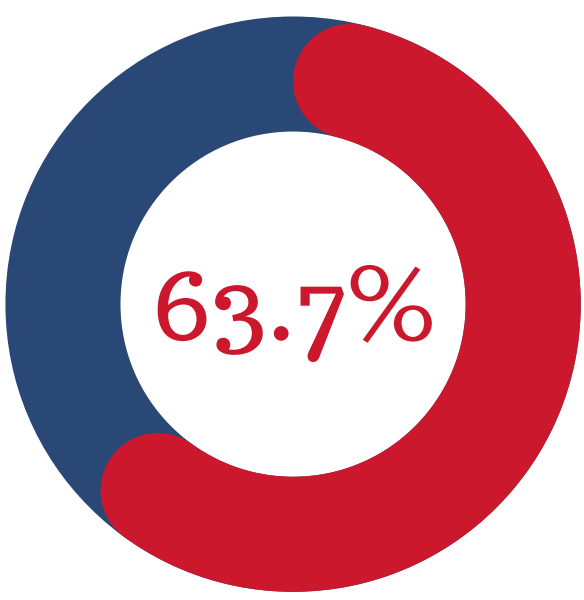
Device Clinical Trial Survey

Advancing Clinical Trial Education

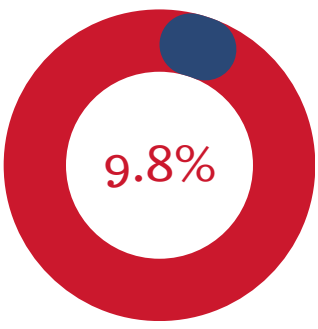




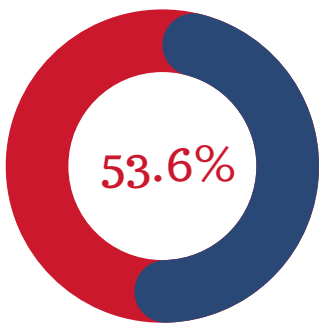
Recent survey shows that 47% of valve disease patients **DO NOT** get information on clinical trials that they might be eligible for.



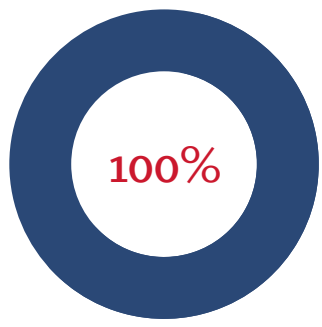
63.7% of patients stated that they received their information about clinical trials from somewhere **OTHER THAN** a doctor, surgeon, or their hospital.



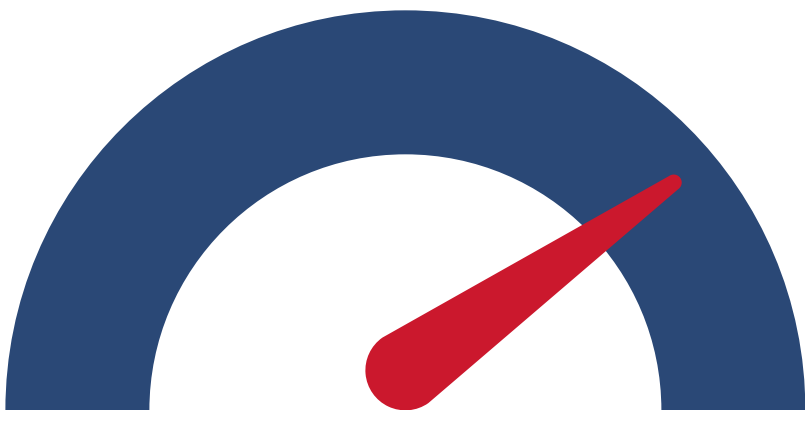
Only 9.8% of patients report that they have been asked to be in a clinical trial



53.6% of patients who were asked said YES!



100% of patients who signed up for a trial, completed it.



78% of patients surveyed believe that clinical trials advance science

Additional Findings:

*The most important benefit of clinical trials, according to the survey participants, is improving patient care by improving quality of life.

*The most important factor in deciding about a clinical trial, according to survey participants, is a clear understanding of what the trial is about.
